

Bring images into outside circle to allow for bleed. The labels will be die-cut on inner circle.

**THIS LAYOUT IS FOR A 4" LABEL USED FOR A 12" RECORD. LABELS ARE STEPPED AT 4.25" CENTER TO CENTER.**

If your labels are to be printed in more than one color, then colors should be indicated *in registration color* so they will appear on each negative. Registration marks, including center dot, should also be *in registration color* so that they will appear on each color.

If you do not have the option for registration color then the registration marks must be created in each of the colors to be used. Each color must be indicated *in that particular color*, so as to appear on the negative *for that color*.

**Please run out a print from your computer with separations checked.** This will enable you to see what is printing out on each of your colors and make any adjustments needed.
